REMARKS

Applicants have canceled claims 27-34. Applicants have amended claims 2-8, 10-17, 19-26 and 35-36, and have added new claims 37 and 38. Applicants amended claims 2-8, 10-17, 19-26 to replace the phrase "An optical sensor as defined in claim" with the phrase "The optical sensor of claim," and replace the phrase "A method as defined in claim" with the phrase "The method of claim." Applicants have amended claims 35 and 36 to be singly dependent, and have added new dependent claims 37 and 38 to claim the inventions removed in the amendments to claims 35 and 36. Applicants maintain that the cancellation of a claim makes no admission as to its patentability and reserve the right to pursue the subject matter of the cancelled claim in this or any other patent application. Applicants maintain that Applicants submit that the amendments are of a formal nature, add no new matter and are fully supported by the specification as filed. Support for the amendments to the claims above as well as for the new claims is found throughout the specification.
